Insurance Eligibility Discovery

START DISCOVERING REVENUE TODAY

With growing self-pay portfolios and decreasing margins, you need to proactively protect your revenue. Reduce your financial risk and the strain that a lack of payment can cause by easily discovering active coverage. Insurance Eligibility Discovery allows you to submit real-time and batch eligibility requests to multiple payers at once using minimal patient data. This automated process can identify a patient's insurance carrier in a matter of seconds. Integration options are available, which allows you to stay within your practice management system to discover coverage.

Maximize revenue by:

- **Finding coverage up front to save headaches later.** Easily check coverage when insurance information is not provided at the time of scheduling or service.
- **Supporting traditional eligibility.** Search for coverage when a patient's eligibility check fails.
- **Supplementing payments.** Realize additional revenue even after claim payment through coordination of benefits plans and close the gap on a zero balance account.
- **Decreasing collections.** Be confident in the knowledge that you have done all you can before submitting patients to collections.
- **Identifying retroactive Medicaid.** Uncover backdated Medicaid coverage activated after the date of service.

REDUCE RISK WITH INSURANCE ELIGIBILITY DISCOVERY

Identified active coverage for 52% of patients

Found historical coverage for 25% of patients
