

# 7 REASONS WHY YOUR PRACTICE NEEDS CREDENTIALING HELP

**1 ADDING PROVIDERS**

We recognize that it may take 90-180 days to have your provider credentialed, and our credentialing team is committed to submitting all required materials quickly to ensure timely enrollments.

**2 PRACTICE CONSOLIDATION**

Although new providers may be credentialed under their previous practice, certain requirements still need to be met if the provider is new to the practice. Don't forget this important step to ensure your new providers receive timely payments from insurers.

**3 MOVING OR ADDING PRACTICE LOCATIONS**

Our demographic change services can complete the necessary paperwork to update physician credentials with any payer.

**4 STAFF TIME CONSTRAINTS**

Provider office employees often are responsible for credentialing while juggling other tasks. Let us take over this workload so they can focus on other tasks.

**5 EXPANDING PAYER NETWORKS**

Adding additional payers to the mix can increase the client base for practices by accepting additional insurances, and our team can help make it a painless process.

**6 MERGERS AND ACQUISITIONS**

If you're building a business, providers must be re-credentialed as part of a merger or acquisition. Get it done quickly with the help of our experts.

**7 RE-CREDENTIALING CURRENT PROVIDERS**

Existing providers must be re-credentialed every few years. TPS monitors all re-credentialing timelines on behalf of the providers, making the process easy and effortless for the medical office.
