

TEXT-TO-PAY

COLLECT MORE, FASTER

Americans check their phones 96 times a day¹. Take advantage of this trend and present patients with a fast, secure and convenient way to make payments. Text-to-Pay, an exciting addition to our patient payment portal solution, allows you to send balance alerts and payment requests via text. Patients can then securely pay their balance directly from their mobile device.

Fifty percent of payments made by text happen within the first hour.² By incorporating Text-to-Pay in your patient payment strategy, you can collect revenue faster and engage patients on their terms.

Maximize revenue by:

- Driving more online payments
- Improving convenience and payment rates
- Shortening the timeframe to payments compared to printed statements

Help improve payment completion rates and drive more cost-effective online receivables.

IMPROVE PATIENT COLLECTIONS

Patients are
21% more likely to pay
after receiving a text²

Patients pay
≈ 7 days Faster via text
than mail²
