TPS TRADING PARTNER SERVICE

A BETTER WAY TO MANAGE TRADING PARTNERS

Most payers today operate multiple connections to trading partners, EDI vendors and other parties that, in turn, route claims to providers. Managing the multitude of connections and keeping them up to date is not only costly and time-consuming, but it also diverts payers' IT resources from strategic priorities.

TriZetto Provider Solutions offers a service—a fully outsourced EDI transaction management and provider trading partner management service based on our clearinghouse technology platform. This solution allows the payer to maintain it's unique trading partner governance and establish its own criteria for new and existing trading partners, while TriZetto manages trading partners on behalf of the payer. The TriZetto Trading Partner Service leverages TriZetto Provider Solution's extensive connectivity assets and Revenue Cycle technology platform to manage the many-to-many connections between payers and providers efficiently and cost-effectively. The service:

- Replaces expensive, custom-built one-to-many Trading Partner solutions with a secure, robust and scalable many-to-many system

- Addresses compliance with applicable regulations and keeps pace with changes

- Helps payers keep costs predictable through PMPM pricing

- Enables payers to maintain their unique trading-partner selection and governance

- Enhances collaboration with numerous providers and vendors, and the shared-services approach reduces redundancies and includes predictable PMPM pricing, allowing for higher volumes of transactions
