

iscribehealth®

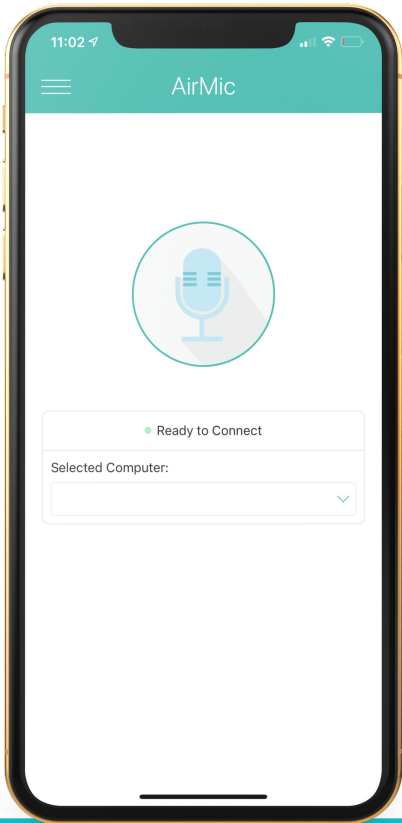

One Solution For Every Workflow

Virtual Scribe Services

- 2+ Hours saved per clinic day
- 10 More patients per clinic day
- \$10k Monthly increase in revenue

Simply record patient encounters using your preferred device, whether it's an iPhone, Apple Watch, or other iOS mobile device. Audio is received by a trained medical scribe who creates the note and places it into your EHR. Notes are created based on provider and clinic preferences. Physicians only have to review and sign off!

AirMic Speech-to-Text

Use AirMic on any iOS device

Voice recognition software

Accurate, time saving speech-to-text

Use your iOS mobile device as a microphone! Watch text immediately appear in the location of where your cursor is located, in any program on your desktop! AirMic can be used on several desktops throughout your clinic and can operate on Windows or Apple computers.

Stop Clicking. Start iScribing.

The solution is at your fingertips!
