

SaaS based, AI Enhanced Third Party Servicing Platform

Why Use Gain Servicing?

About Gain Servicing...

Our mission is to provide access to healthcare for all patients by improving the efficiency of our healthcare provider partners who accept payment via LOP.

Gain Servicing has developed a proprietary **SaaS based, artificial intelligence (AI) enhanced platform** to simultaneously track the tens of thousands of lawsuits relating to LOPs from inception to settlement. We offer our technology, people and processes as a service to healthcare providers to manage their LOPs from time of treatment through repayment. Our service is proven to get providers better reimbursements for their LOP balances, at a lower cost, compared to any in-house or third-party solution.

We offer three standard options to help with your LOP patients:

1. Pure Servicing
2. Partial Advance
3. Outright Purchasing

We are proud to say that Gain Servicing is one of the fastest growing FinTech companies in the US, our parent company is #3009 on the 2020 Inc 5000 list.
