Analytics+

Analytics+ provides all the functionality of Analytics Lite with the additional views of client data. With Analytics+ KPIs, clients can analyze provider, payer and CPT code metrics allowing clients to discover and interpret patterns within their data. Clients have the further ability to interactively drill down into the transactional level detail focusing on areas of concern and benchmark against specific metrics and KPIs.

Analytics Lite

Analytics Lite provides a high level insight into claims, remits, eligibility, prior authorization and claim status inquiry data across 13 months of historical data. Clients have access to RCM core key performance indicators that will allow them to quickly identify the overall performance of their practice/billing service. Through the aggregated views, clients can identify trends and patterns to quickly identify outliers and take action.

Advanced Claim Editing

Leverages AI-driven denial prediction, automated eligibility checks, and comprehensive coding edits to prevent claim denials, ensuring optimal financial outcomes and reducing administrative burdens for healthcare providers.

Insurance Eligibility Discovery

Mitigate financial risk by using an automated process to identify a patient's insurance carrier in a matter of seconds. Ability to submit a real-time eligibility request using minimal patient data to multiple payers at once.
