

One Solution for Every Workflow

Time spent on EHR documentation has risen drastically, but as a physician, you shouldn't have to do all the administrative work. With our mobile efficiency solutions, we can help you to reduce the time spent on documentation and help you re-focus on what's most important: your patients.

INCREASE PRODUCTIVITY

Generate 20% more revenue and save 2 hours per day by eliminating hours of administrative and after clinic hours documentation.

REDUCE COSTS

Eliminate your documentation burden and cut costs rather than having highly-paid physicians spend their time as data-entry clerks.

IMPROVE PATIENT INTERACTIONS

Bring your focus back to the patient to improve each individual experience as well as patient retention.

Highlighted workflow options:

iSCRIBE MOBILE

Our iOS app mobilizes your existing EHR. Document with speech-to-text, chart pull forward, and templates to immediately transfer the data into your EHR system, from anywhere! In addition, you can input orders, diagnoses, and complete encounter billing all from a single device.

TELEMEDICINE

Utilize your iScribeHealth app to track and launch your virtual appointments from one device. Telehealth visits and completing clinical documentation has never been easier!

VIRTUAL SCRIBE

Simply record the entire patient encounter using your preferred iOS device. Our virtual scribes will create the note in full and insert any required templates. The provider has the final review and sign off.

TRANSCRIPTION

Fully integrated transcription services with improved turnaround times. Upon note completion, the data is automatically returned into specific sections of the note (HPI, PE, assessment, plan, etc.).
