WHAT OUR CLIENTS SAY

“

"Nsight has provided my practice with passive income and an improvement to patient care. The benefits from this program have been nothing short of significant. It's a phenomenal tool that is setup in an organized and easy-to-use way. I have patients I never thought would be so interested in monitoring their blood pressure. I now see a wealth of data that I otherwise wouldn't have."

MD, New York. NY
200+ patients enrolled

“

"Integration into our system was seamless. The data is available in real time in our EHR and in the Nsight portal. Nsight is very easy to work with and is dedicated to the needs of our patients. I have vetted many vendors over the years and this process was the easiest in terms of implementation while having a significant impact on the health of our patients."

VP of Health Operations, FQHC
25,000+ patients enrolled
